

## Kondensat-Lift – Compact Condensate Lifting Unit

### Applications:

Condensate lifting unit for fully automatic pumping of condensate from

- Condensing boilers
- Air-conditioning systems
- Refrigeration systems

### More information:

# Kondensat-Lift – Compact Condensate Lifting Unit

## Space-saving

- Very compact design
- Wall-mounted

## Dependable

Disposal of any condensate by automatic operation with start/stop switch

## Simple to install and commission

Plug-in system

## Low noise level

No loud noises during start-up or operation

## Reliable

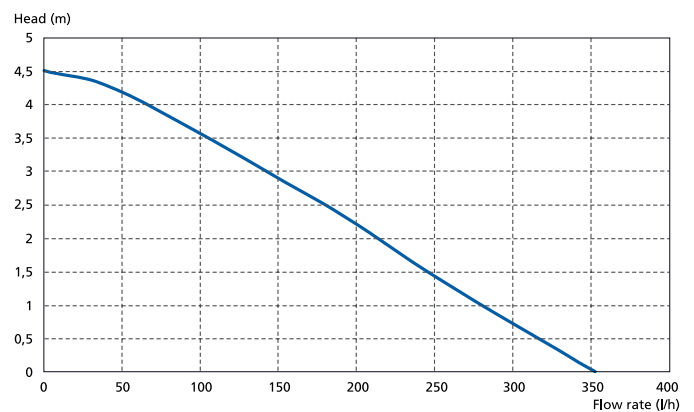

- Fitted motor protection prevents overloading of the motor
- Integrated swing check valve prevents drainage of the discharge line.

## Flexibel

Pump section can be rotated 180°

Kondensat-Lift characteristic curve

## Technical data

Flow rate	Up to 340 l/h
Head	4,5 m
Fluid temperature	+50 °C
